ADDITIONAL INFORMATION SUPPORTING NJD (e.g., paragraph 1 – site conditions; paragraphs 2-3 – rationale used to determine NJD, including information reviewed to assess potential navigation or interstate commerce connections; and paragraph 4 – site information on waters of the U.S. occurring onsite):

This site is in the St Johns River River drainage basin. The forested wetlands on the parcel connect to adjacent wetlands but are isolated, with respect to Corps jurisdiction, for they do not connect to waters of the United States. Further, these areas were more than 200 feet removed from any kind of drainage feature with surface water and/or an ordinary high water mark. The wetland areas are not navigable and there does not appear to be a nexus to interstate commerce.
